# VIVID MATTE VINYL

## VIVID MATTE VINYL

**DMVLA5** offers those who prefer water based print technology a proven solution for adhesive applications. **DMVLA5** works best when applied to smooth, flat surfaces such as glass, acrylic, or mounting boards. It is always best to test for desired adhesion and

removal when applying to textured or painted surfaces.

**DMVLA5** features our Award-winning Magic® “Universal” coating on the front and a permanent adhesive and an easy to release liner on the back. It’s low glare matte finish produces long-lasting prints with excellent color gamut and black density.

## How can you print DMVLA5?

**DMVLA5** is best printed with dye printers, pigment, and pagewide printers.
