PORTRAITS FOR ANY OCCASION

They call it photo quality for a reason! While canvas offers dramatic texture and fabric provides key portability and installation value, there is still nothing quite like photo paper.

SIENA200/SIENA250 are the flagship products of the Siena family, available in luster (slightly textured satin) and gloss in both 8 mil and 10 mil. The **SIENA** photo paper series produces spectacular, life like images that will grab everyone's attention. Prints dry instantly and exhibit vivid colors that will not fade on display.

From gallery installations, to wedding books, or reprints of the kids, the **SIENA** photo paper series has the solution just for you. **SIENA** is available in 10 mil for something a little extra special - best for framing or gallery reproductions. It is also available in 8 mil, which is perfect for production posters or everyday.

How can you print SIENA200 & SIENA250?

SIENA200/250 is best printed with dye and pigment printers.

Looking for something sticky? Try **SIENA200GPSA (Gloss)** or **SIENA200LPSA (Satin)**!
